CELEBRATING ACADEMIC SUCCESS

A celebratory event, recognising the exceptional achievements of the Matric Class of 2023 and their dedicated teachers, was held earlier this year. This initiative, made possible through our partnership with the Department of Education, aims to foster academic excellence within the Ramotshere Moiloa Local Municipality.

At the ceremony, we honoured top-performing Grade 12 learners and schools, acknowledging their outstanding accomplishments with certificates of excellence, laptops, and tablets. Additionally, we recognised the invaluable contributions of teachers, providing them with laptops and tablets to support their continued dedication to education.

We extend our heartfelt appreciation to the Department of Education for their partnership and recognition of our efforts in supporting educational initiatives since 2021.

EMPOWERING LOCAL FARMERS

Congratulations to the five local farmers, who successfully graduated from our Agri4Change programme. Launched in 2021, this initiative aims to empower local entrepreneurs and drive positive change within our community.

Through seed funding and essential business mentorship, participants gained valuable skills and knowledge to enhance their farming enterprises.

Refilwe Saku, a programme graduate, expressed gratitude for the programme's impact, "The programme has helped us to formalise our way of working and to understand agriculture better. We hope that the work Zeerust Solar has done for us will not end with us, but that other people can also be assisted."
