SCHOLARSHIP PROGRAMME SUCCESS

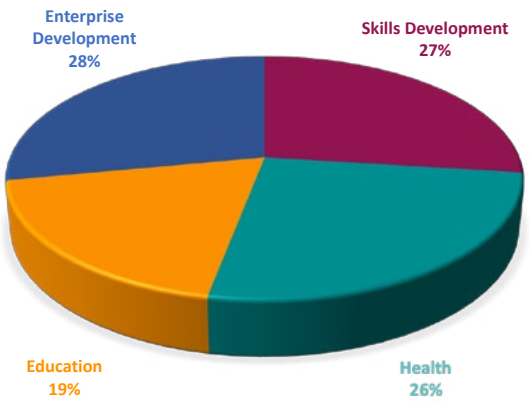

Congratulations to Tlotlo Progress Moletsane, our scholarship recipient, on graduating from the University of Pretoria with a Bachelor of Education in Senior Phase and Further Education and Training. Teaching has always been Tlotlo's passion, driven by her desire to bring change to her community through education, and to help young learners read, write, and succeed.

Tlotlo is one of five students supported by our scholarship programme, which covers full tertiary funding for deserving students facing financial barriers. Beyond funding, the programme offers mental health support and work-readiness workshops to help students transition into the workplace.

Now a qualified teacher, Tlotlo hopes to support struggling learners in her community while continuing to grow. We wish her the very best in her teaching career.

QUARTERLY SPEND

MEET OUR HEALTH AND SAFETY INTERN

Meet Solofelang Mmatladi, the newest member of our safety team. As a Health, Safety and Environment (HSE) intern at the Zeerust Solar Project, she plays an important role in protecting workers and the surrounding community.

Solofelang has completed her formal HSE training and recently registered with SAIOSH (South African Institute of Occupational Safety and Health). These steps are helping her build the skills needed to support safe and responsible work on site.

She's already settling well into her internship, working with site teams, learning the project's systems, and applying what she's studied to real situations on the ground.

We warmly welcome Solofelang and wish her every success in her career ahead.
