CELEBRATING EXCELLENCE: 2023 NATIONAL TEACHING AWARDS GALA EVENT

In partnership with the Department of Education Ramotshere Moiloa Local Education Office, we supported the 2023 National Teaching Awards Gala Event.

This event was dedicated to honouring the teachers who have excelled in their roles and celebrating excellence in education. It brought together educators from schools across the Ramotshere Moiloa Sub-district, all united by their commitment to shaping the future through education.

Teachers were presented with tablets as a token of appreciation and recognition. These tablets were awarded to those who demonstrated the best performance in their respective teaching subjects.

These remarkable educators serve as shining examples of what can be achieved through dedication and a passion for teaching. By acknowledging and celebrating excellence in education, we hope to inspire more teachers to strive for greatness and to continue making a positive impact on the lives of their students. - **Julius Nong, Zeerust Solar's Community Projects Officer.**

UNITING COMMUNITIES THROUGH SPORTS

Through the implementation of our Sports Development Programme, we have embarked on a remarkable journey towards uniting our people.

This programme is designed to develop young aspiring coaches and team owners, formalise their operations, expose them to new opportunities, and produce qualified coaches across various sporting disciplines with the relevant accreditation.

We firmly believe that sporting activities have the power to bridge gaps and bring people together in a way that transcends boundaries. - **Julius Nong, Zeerust Solar's Community Projects Officer.**

The programme has already taken its first steps, starting with the SAFA D-license certification for football coaches around the Ramotshere Moiloa Local Municipalities. The coaches have also had the opportunity to participate in a festival training session, allowing them to apply their newfound knowledge in a real-world context.

EMPOWERING TOMORROW'S LEADERS

Our Career and Leadership Programme, which targets learners in Grades 9 to 12, took place recently. This initiative is aimed at ensuring that learners remain motivated, engaged, and well-prepared for life after high school, including their transition into the world of work.

The programme provides learners with a window into various professions and industries, helping them make informed decisions about their future careers.

In partnership with the Khenn Institute, the programme implementers, four dedicated graduates from our local communities were appointed to serve as coaches. These four remarkable ladies are not only role models for the learners but also a testament to the possibilities that await those who are determined to succeed.

PROVISION OF VITAL MEDICAL EQUIPMENT

In a remarkable display of commitment to community welfare, we stepped forward to support the Department of Health by providing essential medical equipment, as part of our Integrated School Health Programme.

This initiative, nestled within the healthcare sector, is dedicated to enhancing health education, conducting screenings, assessments, delivering treatments, and facilitating referrals at primary and high schools.

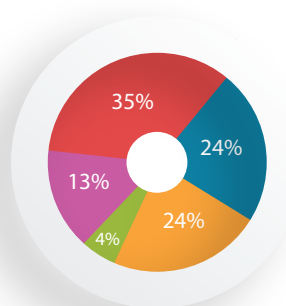

The heart of this programme lies in offering primary health services to learners at these institutions. This includes crucial primary health care screenings such as immunization, Human Papillomavirus vaccination, deworming, and addressing minor ailments.

Zeerust Solar has further fortified this cause by donating a range of invaluable equipment, which includes the indispensable Minus 40 Fridge, Audiometers, Haemoglobin meters, Blood pressure machines, Glucometers and strips, Occluders, Rechargeable ENT sets, and rechargeable cooler boxes.
